

Prof. Gideon Bachar - Chief of the department of Otolaryngology Head and Neck Surgery at Rabin Medical Center, Petach Tikva, Israel.

Dr. Bachar graduated from the Technion Medical School in Haifa Israel in 2000 and completed his residency in the Department of Otolaryngology Head and Neck surgery at Rabin Medical Center.

He fulfilled his master's degree in Electrophysiology of sleep and circadian rhythms under the supervision of Prof. Peretz Lavie in 1998 and was involved in the development of endoscopic imaging techniques in sleep apnea patients.

During the years 2006 -2008 Dr. Bachar undertook a clinical fellow in the Head & Neck surgical Oncology program at the University Health Network in Toronto Canada.

His research interests focuses on the biology of head and neck cancer, the outcome of head and neck surgical oncology and the performance of image-guided surgery in head and neck. Moreover, he's studying the molecular profile of saliva from oral cancer patients.

For the last 10 years Prof. Bachar has performed a varied range of robotic procedures including Transaxillary and face-lift approach Thyroidectomy. In addition, he is one of the Israeli pioneers in Trans-oral robotic surgery for sleep apnea patients and oropharyngeal cancer. He has written a book chapter on robotic Thyroidectomy and his work regarding robotic surgery was published in the English literature in the Atlas of Head and Neck Robotic Surgery.

Prof. Bachar published over 70 peer review articles in leading international journals and presented his academic work in numerous meetings worldwide. Currently he is an Associate Professor of the faculty of Medicine in the Tel Aviv University and holds the position of Chief of the Department of Otolaryngology Head and Neck Surgery at Rabin Medical Center in Israel.
